

Dear Helsinki-Tallin Race Participants,

Welcome to MarinaBay Harbor! We're excited and proud to be the starting point for the Helsinki-Tallin race. If you're planning on berthing with us on the night of the 17th of August before the race, here are some guidelines for a hassle-free stay:

**Getting Your Keys:** Each boat is entitled to up to two keys from us. These keys allow you to access harbor services and the dock gate. Please collect them from our office when you arrive on the 17th. If you run into any issues or have questions, our team is right here to assist.

**Using Your Keys:** Make sure to keep your keys safe throughout your stay. It's crucial they don't get lost or land in the wrong hands.

**Returning Your Keys:** Once the race kicks off on the 18th, kindly return the keys to our office. This step ensures we maintain harbor security and can reuse the keys.

**Berthing and Harbour Plan:** We have specific berths set aside for the night of the 17th. The harbour plan has been published and is available on the competitors' main information board. Please be aware that some berths are subject to change during the evening. Specific vessels have been assigned particular berths, and these should be strictly adhered to. If you need guidance on where to berth your boat or any other related queries, feel free to approach our team. For direct berthing questions, our line +358505448008 is always open.

**Radio Contact:** We're also available on VHF channel 68. Should you need to reach out, don't hesitate.

**Dock Places:** Important - if you've reserved a berth but don't arrive by 8:00 pm on the 17th, that berth will be offered to other marina guests. This policy ensures we utilize all available spaces efficiently.

Safety and environmental care are top priorities for us. We truly appreciate your cooperation with these guidelines and thank you for your understanding in following the harbour plan.

Wishing you an exhilarating race and a comfortable stay at MarinaBay Harbor!

Warm regards,  
Arthur von Weissenberg  
Harbour Master
